**Subject:** grant proposal

Bodhi,

My proposal for the 5,000 Earth Grant would mainly be in the use of teas and tinctures, as they are a more nutritional method to ingest many of your botanicals.

Seeds would also be another priority because I have the area and the "green thumb" to make a wonderful garden in no time.

This 5,000 dollar grant is a nice amount of money, that would help the people i know remember what its like to be young again. It would also help me in my degree of botany im trying to do at my local technical college.

I hope that is what you guys needed in terms of a "proposal." If not, then a return e-mail stating what a proposal is would be wonderful.

- Daniel
